Hi All,

Tim, I've not been included in the planning of these meetings prior to this. Karen managed them and gave us updates. It is my impression that not much time was spent on water quality standards for Bay-Delta in the past. I don't know what they talked about. But the SJV flows document is out there now and it would be helpful to know (or confirm) their perspective on SJV flow objectives as an approvable CWA WQS. It is possible that is a waste of time?? I don't know what these meetings are like. The other item I'm curious about is how they see their WQS update dovetailing with BDCP operations discussions.

Hi Tom:

I put a placeholder on the agenda for the Bay Delta, and suggested several facets for discussion, i.e., WQCP, Delta RMP, advancing implementation of Delta mercury TMDL, noting the proposed Port of Stockton DWSC, etc.

I'd greatly appreciate input from the Team on what items I should raise, and I welcome your collective ideas on how to proceed. I've never been engaged on planning and executing one of these meetings, so I'm just going on instinct right now.

Thanks, Tim

=====

I see Bay Delta issues as the first topic. Twenty minutes.

I don't see any Delta team members on the distribution list (other than Sam)..

I have coordinated with Wampler regarding the Caltrans item on this agenda, but upon seeing the full agenda thought I'd share it with you folks. Some of the other items may relate to your matters and you may want to follow up with your WTR counterparts as appropriate.

Hi Kathleen/Arlene/Greg - Here's the agenda for the meeting this Friday with State Board during which we'll discuss Caltrans Enforcement (room 1209). Please consider joining the discussion if you're available and hear from State Board what they're considerations are as they work with CT to improve compliance. This will be a high level discussion so I don't plan to get into details about cases, but a general discussion of our respective enforcement strategies, timelines and the need to continue to coordinate will be valuable.
